

## • PRESS RELEASE 1/7/08

### HENDRICK MANUFACTURING INCREASES ITS FABRICATION CAPABILITIES WITH NEW EQUIPMENT

Hendrick Manufacturing, a leading manufacturer of Perforated Metal Products and Profile Wire Screens, has added several new pieces of fabrication equipment to its Carbondale facility in order to meet customer demand.

At the suggestion of customers who want a fabricated assembly, Hendrick has added additional CNC press brake capabilities to its already impressive stable of fabrication equipment. Additionally, Hendrick has acquired new welding capability for high-precision work where cosmetics are important. Finally, in keeping with the company's desire to lead the metal-working industry technologically, Hendrick co-developed and purchased the newest generation of deburring/polishing machines.

Hendrick is already known for the shortest lead-times in the perforating industry and it intends to maintain that title with fabrications. Hendrick can now be considered a single source supplier, assuring the quality and rapid delivery necessary to meet the fabrication needs of those customers who wish to improve their purchasing process. Those customers who do their own fabrication work now have a backup to their in-house capabilities.

Hendrick will continue to build on its successful core perforating business with new acquisitions in the future.

Hendrick ([www.hendrickmfg.com](http://www.hendrickmfg.com)) is a 132 year old privately held company based in Memphis, TN with operations in Pennsylvania, Kentucky and Illinois. Hendrick currently provides the most complete variety of perforated metal for thousands of customers in both sheet and coil form in North America and provides many secondary processes for customers to receive both semi-completed and completed parts. Hendrick is known for its uncompromising quality and industry-leading lead-times. Hendrick Screen Company ([www.hendrickscreen.com](http://www.hendrickscreen.com)) is the leading supplier of profile wire screens to the Water/Wastewater, Food & Beverage, Petrochemical, and Architectural industries. Hendrick Metal Products ([www.hendrickmetalproducts.com](http://www.hendrickmetalproducts.com)) is a recognized precision metal fabricator catering to the telecommunications, food, medical and architectural industries.
